

IAADent

International Academy of Advanced Dentistry

IAADent Advanced Periodontics Course 2024

This is an advanced theory and clinical training program for general dentists looking to expand their knowledge in periodontology and to provide periodontal treatment to their patients. It is designed so you can immediately implement periodontal procedures into your general practice safely and successfully. The education delivered is based on a complete review of the literature on Periodontology with a summation of over 500 articles and reviews. The course focuses on the latest evidence-based procedures and explores novel uses of autologous blood concentrates in periodontology.

Session 1: 8 – 9th March 2024

Session 2: 26 – 27th April 2024

Session 3: 31st May – 1st June 2024

Session 4: 9 – 10th August 2024

Session 5: 20 – 21st September 2024

Session 5: 15-16th November 2024

Periodontology 101 & Non Surgical Management

Surgical Periodontal Management & Crown Lengthening

Regenerative Therapies & Soft Tissue Plastics 1

Soft Tissue Plastics 2

Peri-implant Disease Prevention & Management

Implant Soft Tissue Plastics

All sessions will start at 9:00AM (Registration starts at 8:30AM).

Lectures will finish at 5:00PM with case reviews to follow.

Location: Level 2, 394 Lane Cove Rd, Macquarie Park, NSW 2113 (Hyundai Building) Offices of Minimax.

Registration: For registration or enquiries, visit <https://www.iaadent.com> or email admin@iaadent.com

NOTE: All dates are subject to change. During the course, there could be some changes to the dates/venue/some contents. Should this happen, you will be notified via email in advance, regarding the date/venue change.

DR SHENG ZHANG

BDS (Adelaide University, University Medal), BOH (Sydney University)
MDSImplantology (UJI), GradDipOrtho (JCU)
Fellow Royal Australasian College of Dental Surgeons
Fellow International Dental Implant Association
Fellow International Academy for Dental-facial esthetics

Practice limited to periodontology and implantology

Owner of Dental Artistry, an award-winning boutique dental practice in Auckland with a focus on implants, periodontics and cosmetic dentistry.

COURSE INFORMATION

Session 1: Periodontology 101 + Non-surgical Management

- Complete review of periodontology 101 - biology, aetiology and pathogenesis.
- Explore and develop a deep understanding for the 2017 Periodontal Disease Classification.
- Evidence based management of periodontal disease including assessment, treatment, and maintenance in general practice.
- Hands on clinical training with powered and hand instruments.
- Introduction to minimally invasive non-surgical periodontal therapies.
- Understanding of exact equipment setup required for your practice and instrument maintenance.

Bring your Dental Auxiliary to implement immediately into your hygiene department

Session 2: Surgical periodontal therapy + Crown Lengthening

- Surgical management of periodontal disease.
- Evidence based management of different periodontal bony defects and furcations.
- Introduction to micro surgical techniques and minimally invasive surgical therapies.
- Cosmetic and functional crown lengthening procedures in general practice.
- Hands on clinical training on periodontal models.

Session 3: Regenerative Therapies + Soft Tissue Plastics 1

- Explore the modern era of periodontal regenerative therapies.
- Understand the keys to regenerative surgery and protocol for success.
- Gain a thorough knowledge of biomaterials for regeneration and their clinical indications for use.
- Advanced microsurgical techniques including papilla preservation, minimally invasive surgical techniques, single flap approaches and entire papilla preservation flaps.
- Periodontal plastic surgery focusing on the classic mucogingival surgeries including frenectomy, apical repositioning flap, lateral repositioning flaps, papillary flaps, free gingival grafts.
- Hands on clinical training on periodontal models.

Session 4: Soft Tissue Plastics 2

- Periodontal plastic surgeries focusing on recession coverage procedures.
- Develop an understanding of surgery involving single and multiple teeth with a focus on Coronally Advanced Flap and Modified Tunnel techniques.
- Exposure to different sources and techniques for connective tissue harvesting.
- Combining plastics with restorative treatments.
- Hands on clinical soft tissue plastic training on animal models.

Session 5: Peri-implant disease

- Develop a deeper knowledge on prevention and management of peri-implant disease.
- Clinical protocols for implant maintenance in the general practice.
- Hard tissue and soft tissue surgical techniques for the compromised implant.
- Latest technologies for decontaminating failing implants.

Session 6: Implant Soft Tissue Plastics

- Soft tissue plastics for preparation of implant site.
- Soft tissue surgeries concurrent to implant surgery.
- Developing natural emergence profiles.
- Advanced techniques for implants in the aesthetic zone.
- Hands on clinical training on implant models.
